

# Pedestals

Designers and Manufacturers of Rustguard Enclosures, Primary Sectionalizing Cabinets, Secondary Pedestals and Pole Line Hardware

## Powerglass® UG Feed-Thru Pedestals

## K-SEC 310-A

Electrical Apparatus

### GENERAL

Western Power Products offers Powerglass® enclosures for freedom from rust and corrosion in any environment.

*No maintenance:* Complete absence of ferrous material means every Powerglass enclosure is totally rust free, impervious to attack under any environmental conditions unaffected by fertilizer spray, salt air, or chemicals. Standard Willow Green finish blends easily with its surroundings. Ultraviolet rays do not affect the structural integrity of the enclosure. UV stabilized gelcoat provides a lifetime finish.

*Durable:* Powerglass resistance to impact reduces costs resulting from repair or replacement of dented or damaged enclosures. The aesthetically pleasing unit keeps its appearance year after year.

*Safety first:* Impact resistance means intrusion resistance. Non-conductive characteristics of fiberglass further reduce accident potential on the outside from problems within.

*Fire retardant:* Powerglass will not support combustion.

*Easy to install:* The lightweight, one-piece design permits easy installation. No field assembly required.

With Powerglass, there is no ground line rust commonly associated with steel pedestals.

### BENEFITS

- Convenient, low-cost housings for facilitating preliminary work on UG installations.
- Eliminates need for installing pads and transformers until actually needed.
- Source for future pad-mount transformer.
- Lightweight, easily installed, requires no maintenance.
- Maximizes flexible, efficient use of cable training area.
- Choice of burial depth – 12", 18", 24."
